

# Unstructured Data in Banking and Finance

## Call for Papers

September 17, 2025

Duisburg, Germany - 28th Banking Symposium

[www.bankensymposium.de](http://www.bankensymposium.de)

**Unstructured data** is transforming the financial sector, now comprising most of the data institutions handle—from reports and customer interactions to audio, video, and sensor input. Advances in machine learning and natural language processing are enabling deeper analyses and smarter decisions, while also raising important issues around governance, ethics, and risk.

The **28th Banking Symposium** aims to bring together researchers and practitioners interested in the evolving role of unstructured data in Banking and Finance. We welcome papers from all areas of Banking and Finance that explore the opportunities, challenges, and applications of unstructured data. Contributions may address a wide range of topics, including data extraction, modeling techniques, risk assessment, compliance, and the integration of non-traditional data into financial decision-making. Early-stage work is welcome.

- No submission fees.
- Travel and accommodation costs will be reimbursed for presenters.
- Submission deadline: June 15, 2025.
- Paper selection finalized by end of June 2025.
- Submissions or questions? [bankensymposium@uni-due.de](mailto:bankensymposium@uni-due.de)
- The symposium directly precedes the 31th DGF Jahrestagung in Hagen (September 18-20, 2025). It is possible to reach Hagen by train within 90 minutes.
